

FluFit Program Components & Flow Diagram

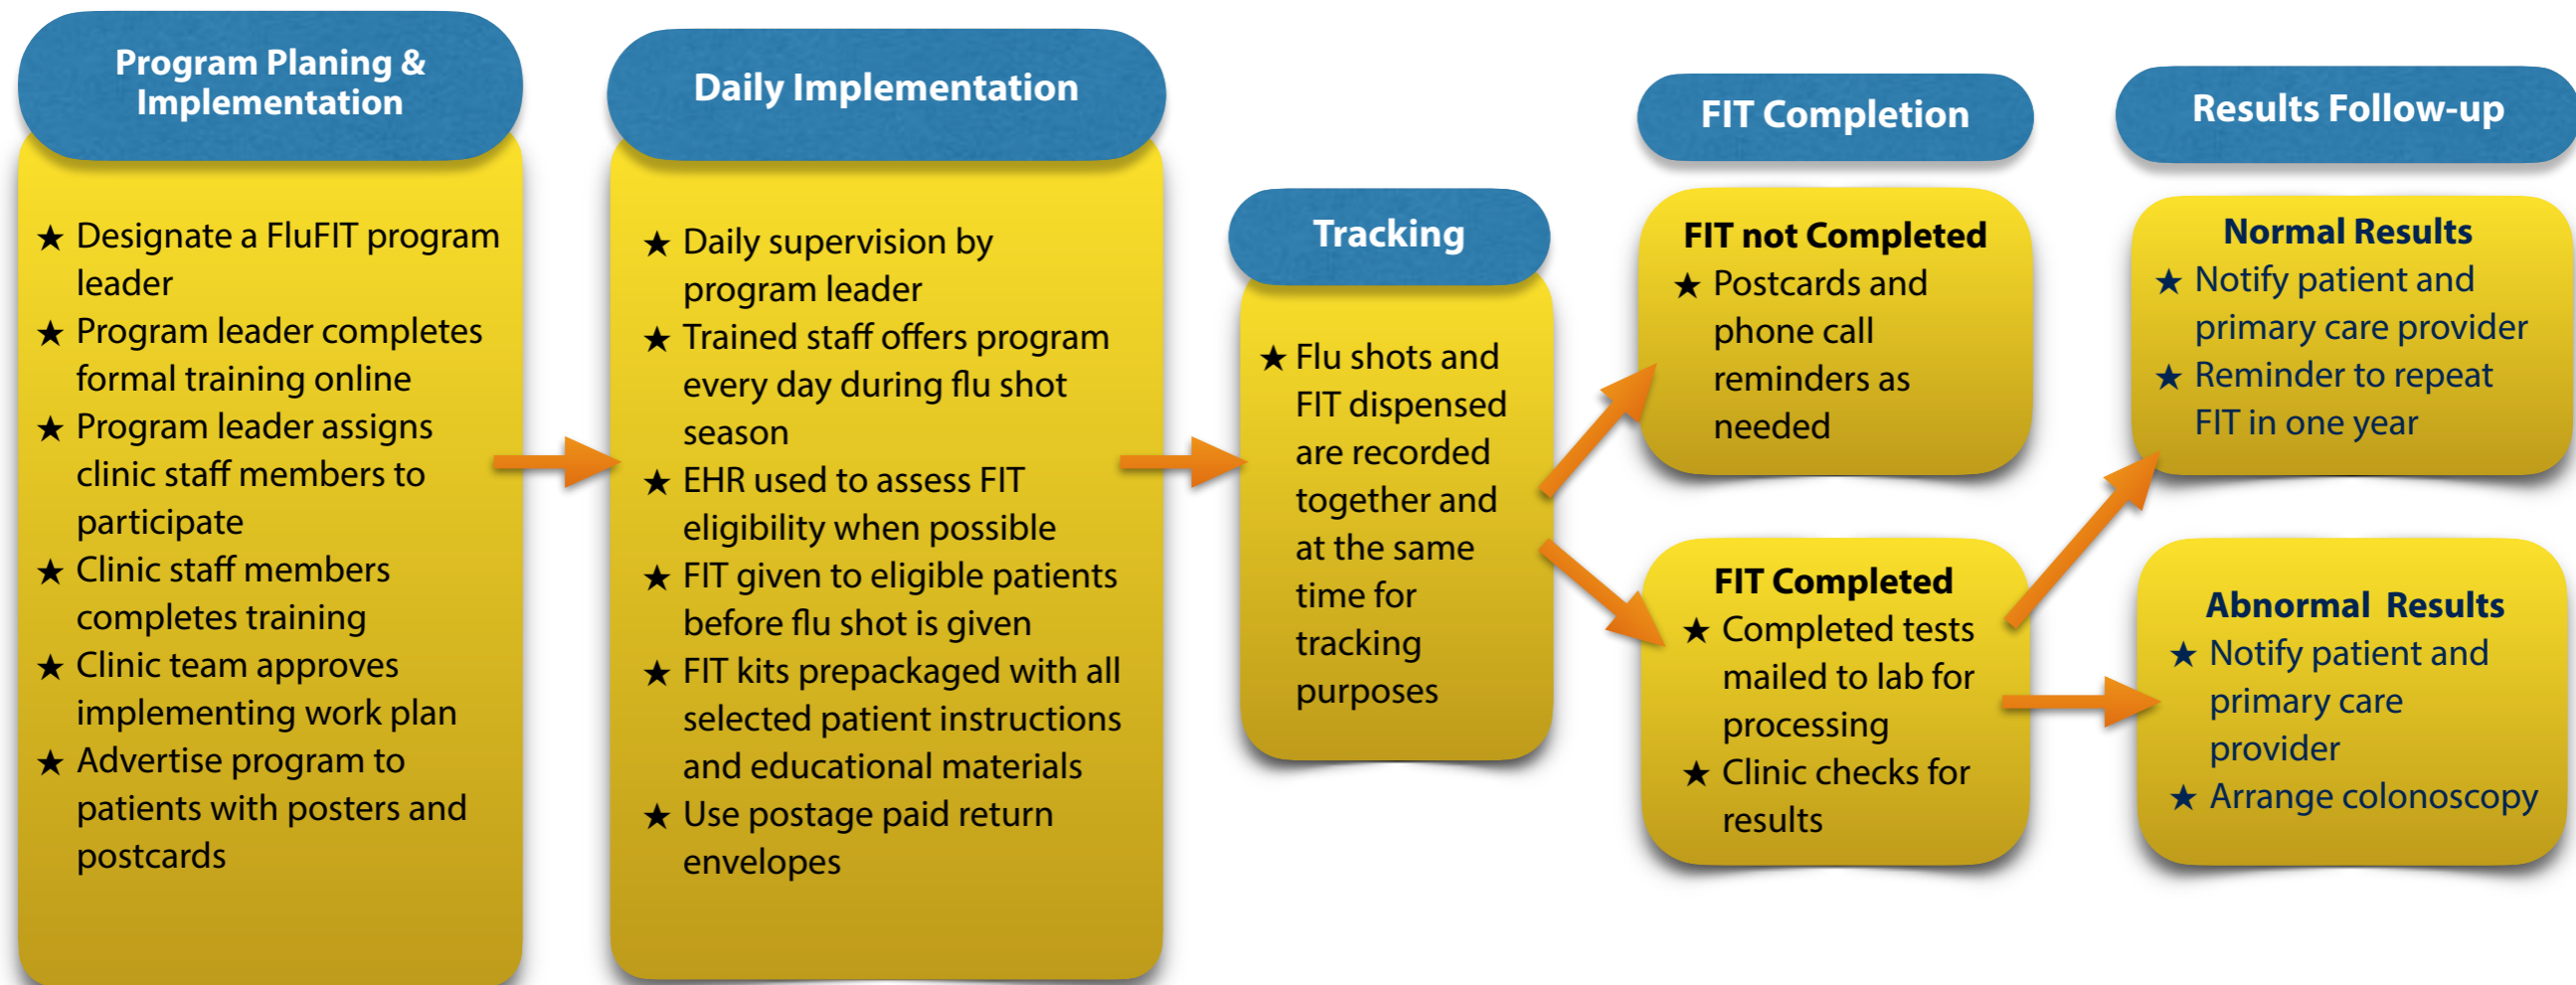

★ **GOAL:** Increase colorectal cancer screening rates by offering home FIT kits to eligible patients during annual flu shot activities

Core Functional Components:

Standing orders to allow non-physician clinic staff to offer flu shots and FIT together to any clinic patient or health care client aged 45-75 who is seen during flu shot season.

Target Clinical Setting:

Community health centers, pharmacies, manage care organizations, and other health care settings where flu shots are provided and where FIT is offered for average risk colorectal cancer screening.

Sample Program Implementation Materials

- Mailed FLU-FIT Program announcements
- Clinic posters to advertise Flu-FIT Program
- Algorithm for FLU-FIT Program patient flow
- Algorithm to use EHR to assess FIT eligibility
- Script to introduce/explain FIT with flu shots with patients
- Visual aids to use when offering to FIT patients
- Multilingual materials to explain why FIT is important
- Multilingual FIT completion instructions
- Multilingual FIT video instructions
- Pre-addressed FIT mailing pouches
- Pre-stamped FIT mailing pouches
- FLU-FIT log-sheet to record flu shots and FIT dispensed
